- The first clear fruit juice concentrate processing plant installed in Pakistan.

Future is bright. Future is fruitful

To be the leading supplier of fresh fruits, vegetables and related ingredients to global and local brands of food, beverage, dairy and bakery around the world.

A business philosophy that bears fruit

IAC's philosophy is to produce competitively price premium quality products coupled with excellent service that exceeds our customers' expectations to bring long term relationship with our customers to fruition.

Since 1960's – Bearing fruit for over five decades

IAC's core line of business is processing and selling fresh fruit, vegetable, fruit pulp, paste, fruit concentrate and clarified fruit juice concentrate. IAC is a name to reckon with in the world of horticulture produce. It has steadily grown in size, scope and reputation for well over 50 years to become an export powerhouse of today.

Our experience is not in export alone, we are equally skilled in orchard management and pre & post harvest treatment application. Since 2004 we have diversified towards fruit and vegetable processing with the inauguration of our fruit processing factory. Our vast experience in the field of fresh fruits procuring and supplying enabled us to setup fruits processing aseptic mango pulping plant of 10 MT/HR with the most modern equipment procured from Italian fabricators.

In 2008, we installed another state-of-the-art Italian and German multi processing plant for value added ingredients like clarified apple, mango, dates, juice concentrate and fruit pulp/puree of mango, guava, banana, peach, carrot and tomato.

The juice separation and filtration systems are from world famous brand Flottweg Germany and Della Toffola respectively. The plant concentrator operates on four effects and is equipped with high efficiency aroma recovery.

A new fruit in the basket

New Processing Plant in Sargodha

In June 2015 IAC established a new factory with the inauguration of a state-of-the-art Aseptic Fruit pulp/ Puree, Paste and Concentrate Processing Plant in Sargodha. The new plant is designed with a capacity to process 14 tons/ per hour of pulp/puree, paste and concentrate. The plant is sourced from world renowned Italian company, along with cold storage facility of 8000 tons has also built in the factory.

Processing Ahead of Time

To further strengthen IAC's leading and guiding position in the industry by taking advantage of domestic raw material, labour and logistic cost to develop to be the largest, most influential manufacturer and supplier of these products not only domestic level but also globally.

IAC firmly believes that by progressing through timely research and development it will become a customer driven organization to obtain the confidence of our national and international customers.

As the first and biggest fruit pulp/concentrate and clarified juice concentrate processor in Pakistan, IAC owns the most advanced processing facilities with strong showing in best equipment procurement and apt use technology. IAC is the torch bearer in developing new technologies and introducing innovative techniques.

Relying mainly on fruit pulp/paste, fruit concentrate and clear fruit juice concentrate related operations along with fresh fruit/vegetable industry, IAC will extend moderately its core business into the related industry at present and in the foreseeable future.

Pure Commitment

IAC is committed to deliver the highest quality product that is why at every stage of the process we test the product for all physical, chemical, organoleptic and microbiological quality parameters. Extreme care is taken to maintain the color, flavor, taste and nutritional value at every stage of production.

Behind our quality products there is a team of Food Technologists, Microbiologist, Engineers, Nutritionists and Quality Assurance specialists who are dedicated to earn our buyer's trust with safe products of the highest quality.

Approved

Peeling off the layers
